

John Kyle Lastimosa

Full Stack Software Engineer | Microservices & Enterprise Systems

 Koronadal City, South Cotabato, Philippines  +63 905 556 2005  johnkyle.lastimosa99@gmail.com

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with **7 years of total professional experience** across software development, database design, and systems engineering since entering the IT industry in 2019. Proven track record across C#/.NET and Java/Spring Boot ecosystems, delivering microservices-based healthcare platforms, ERP modules, accounting systems, and multi-tenant web applications. Deeply skilled in relational database optimization (MS SQL, MySQL, PostgreSQL) and designing high-throughput, secure RESTful APIs.

TECHNICAL SKILLS

Backend Ecosystem:	C# (.NET Core, ASP.NET MVC), Java (Spring Boot, Hibernate), PHP (Laravel), JavaScript
Frontend Technologies:	React, JavaScript (ES6+), jQuery, Bootstrap, HTML5, CSS3, JSP
Databases & ORM:	Microsoft SQL Server, MySQL, PostgreSQL, Supabase, Entity Framework, Hibernate
AI & Accelerated Tooling:	Cursor IDE, GitHub Copilot, Claude, ChatGPT, Gemini, LLM API Integration, Prompt Engineering
Architecture & Tools:	Microservices Architecture, RESTful APIs, Git, JasperReports, Visual Studio, VS Code, IntelliJ IDEA
Practices & Environments:	Agile / Scrum Methodologies, Unit Testing & Debugging, Linux, Windows Server

WORK EXPERIENCE

Computer Programmer • Provincial Capitol of South Cotabato

Sept 2024 – Present

- Architecting and engineering a modular hospital web application leveraging **C# and .NET Framework** within a microservices architecture to ensure high uptime and modular maintainability.
- Designing normalized MS SQL Server relational schemas, indices, and stored procedures supporting clinical workflows and administrative data governance.
- Developing decoupled RESTful APIs to facilitate secure inter-service communication across patient records, admissions, and departmental modules.
- Leveraging **AI-assisted developer tooling (Cursor, Claude, Copilot)** for rapid prototype generation, automated regression test coverage, and strict code analysis.

Full Stack Java Web Developer • Eulap

Sept 2021 – Sept 2024

- Engineered and shipped enterprise web systems across accounting, logistics/trucking, loaning, HRIS, and school management domains using **Java, Spring Framework, and Hibernate**.
- Implemented responsive UI components using JSP, JavaScript, jQuery, and Bootstrap, integrated with backend services.
- Optimized high-volume MySQL queries, indexing strategies, and database procedures to minimize response bottlenecks.
- Automated enterprise reporting, audit trails, and financial statements utilizing JasperReports engine.
- Mentored junior developers through peer code reviews, Git branching strategies, and sprint planning in an Agile environment.

IT Staff / Systems Support • Lariosa Clinic & Hospital Inc.

July 2019 – Nov 2020

- Maintained healthcare IT infrastructure, administering hospital local area networks, server security, and mission-critical hardware.
- Diagnosed and resolved critical hardware, network, and clinical workstation software issues, ensuring 99%+ operational availability.

EDUCATION

Bachelor of Science in Information Technology • Mindanao State University – General Santos City

Aug 2015 – June 2019

Major in Database Management
