

John Kyle O. Lastimosa

Full Stack Software Engineer | Microservices, Cloud & Enterprise Web Systems

 Koronadal City, South Cotabato, Philippines  +63 905 556 2005  johnkyle.lastimosa99@gmail.com

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 7 years of professional experience across software development, systems architecture, and database engineering since entering the IT industry in 2019. Proven track record architecting high-throughput microservices, healthcare platforms, ERP modules, and financial platforms across C#/.NET, Java/Spring, and Node.js environments. Demonstrated expertise designing and deploying scalable RESTful web services (JSON/XML), configuring multi-tier relational (SQL Server, MySQL, PostgreSQL) and NoSQL (MongoDB) data stores, and adopting containerization workflows (Docker, Postman, Jira, GitHub) across Linux and Windows platforms.

TECHNICAL SKILLS

Backend & Middleware:	C# (.NET Core, ASP.NET MVC), Java (Spring Boot, Hibernate), Node.js, Express, PHP (Laravel), TypeScript, JavaScript
Frontend Technologies:	React, Angular, JavaScript (ES6+), TypeScript, jQuery, Bootstrap, HTML5, CSS3, JSP
Database Systems:	Microsoft SQL Server, MySQL, PostgreSQL, MongoDB, Supabase, Entity Framework, Hibernate
DevOps & Developer Tools:	Docker, Postman, Jira, Git, GitHub, VS Code, Visual Studio, IntelliJ IDEA
Web Services & Architecture:	Microservices, RESTful Web Services (JSON, XML), Distributed Middleware, Open-Source Tools, JasperReports
AI-Assisted Engineering:	Cursor IDE, GitHub Copilot, Claude, ChatGPT, Gemini, LLM API Integration, Prompt Engineering
Operating Systems & Agility:	Linux (Ubuntu/Debian), Microsoft Windows Server, Agile / Scrum Methodologies

WORK EXPERIENCE

Computer Programmer • Provincial Capitol of South Cotabato	Sept 2024 – Present
- Architecting an end-to-end modular hospital management system utilizing C# and .NET Framework within a microservices architecture optimized for speed, fault tolerance, and institutional scale. - Designing and optimizing normalized MS SQL Server & relational database schemas to maintain sub-second query execution, rigorous transaction isolation, and compliance with healthcare data regulations. - Developing, testing, and deploying secured RESTful web services in JSON and XML via Postman and GitHub, enabling decoupled inter-service communications between laboratory, clinical, and billing engines. - Collaborating in Agile/Jira sprint workflows and implementing containerized deployment practices (Docker) across Linux and Windows host environments. - Utilizing AI developer tooling (Cursor IDE, GitHub Copilot, Claude) to accelerate prototype delivery, automate test suites, and conduct deep code reviews.	
Full Stack Web Developer • Eulap	Sept 2021 – Sept 2024
- Engineered and shipped high-concurrency commercial web systems across accounting, trucking logistics, loaning, HRIS, and education sectors using Java (Spring Boot), TypeScript/JavaScript, and Node.js/Express components. - Built responsive dynamic frontend interfaces utilizing React, JSP, jQuery, and Bootstrap, integrated with backend services. - Engineered data storage layers using MySQL and MongoDB, designing optimized indexing and caching strategies that resolved high-volume query bottlenecks. - Automated enterprise financial statements, invoices, and operational audit reports via the JasperReports engine. - Collaborated within Agile teams, tracking sprint epics via Jira, maintaining GitHub repositories, and mentoring junior engineers.	
IT Systems & Infrastructure Staff • Lariosa Clinic & Hospital Inc.	July 2019 – Nov 2020
- Administered enterprise IT infrastructure across Linux and Windows Server environments, safeguarding network routing, firewalls, and workstation availability. - Maintained clinical support terminals and database integrity, resolving hardware and software outages to guarantee uninterrupted hospital operations.	

EDUCATION

Bachelor of Science in Information Technology (BSIT) • Mindanao State University – General Santos City Aug 2015 – June 2019
Major in Database Management • Systems Analysis, Data Structures, Relational & Distributed Data Architectures
